Northwest Territories Population – January 2014

On January 1, 2014 Statistics Canada estimated that 43,641 people were living in the Northwest Territories, a decrease of 0.1% from the previous year. By comparison, Canada's population increased by 1.2% over the same period. With the exception of the Northwest Territories and most of the Atlantic provinces, all other provinces and territories experienced positive growth between January 1, 2013 and January 1, 2014. Growth exceeded the national level in Alberta (3.4%), Nunavut (2.7%), and Saskatchewan (1.8%). Please note, these estimates are based on the 2011 Census, adjusted for census net undercoverage.

In total, the population in the Northwest Territories fell by 31 persons between January 1, 2013 and January 1, 2014. The components of natural increase consisted of 689 births and 199 deaths, resulting in a net increase of 490 persons. Inter-provincial migration accounted for 1,885 persons moving into the Northwest Territories from other provinces and territories, while 2,567 persons moved away, representing a net loss of 682 persons. Internationally, there was a net in-migration of 161 persons.

In terms of quarterly growth, the NWT population increased by 119 persons between October 1, 2013 and January 1, 2014. This was the first increase in the last four quarters (Figure 1). The population increase resulted from a gain of 108 persons through natural increase and 23 net international in-migrants offset by a net loss of 13 inter-provincial migrants. Between October 1, 2013 and January 1, 2014 the NWT saw the first positive total net migration of 10 people since July 1, 2011.

In the NWT, population growth fluctuates based on migration patterns; over the past 10 years, generally, net inter-provincial migration has been negative, offset by positive net international migration and natural increase. Since 2011, the NWT has only had one quarter with net interprovincial in-migration and two quarters with negative net international migration (Figure 1).

Note: *Net International* represents the net total of all Immigrants, Emigrants, Returning Canadians, Non-Permanent Residents and Individuals Temporarily Abroad.

Error of Closure represents the difference in population change as measured by the individual components of growth and that observed using 2011, 2006, 2001 and 1996 census-based population estimates.
